

Quality Control

Certificates

Before putting on shelves The Honey undergo quality control by three independent organisations:

1) **Internal control** in the own accredited laboratory. Raw material is analysed on physical and chemical characteristics and its purity. We utilize ELISA and RIA methods using the equipment of leading producers (Charm, Randox).

2) **Independent certified laboratories in the EU (Germany) (Quality Services International, Intertek Food Services, Eurofins GeneScan)** make quality control and issue certificates with detailed analyses and characteristics of the honey.

3) **Border control**. During the delivery, our honey undergoes veterinary control on the EU border as a requirement of the European Union.

Production facilities got **ISO 22000:2005** certificate. **NFS International** issued Certificate of Compliance that confirms meeting requirements of the **True Source Certified™ Standard**.

We may send you a photocopy of the documents on the request when you are intended to buy our products.

Sincerely yours,
Oleh Chernyuk
